macyzig5@gmail.com | 720-785-0657 | Orlando, FL | www.linkedin.com/in/macy-ziegler

Professional Summary

Strategic planning and analytics leader specializing in resource planning, forecasting, operational optimization, and enterprise decision-support solutions. Experienced leading cross-functional initiatives from requirements and model development through implementation, translating complex operational data into actionable plans and recommendations. Combines an Industrial Engineering foundation with technical depth in SQL, Python, Snowflake, and predictive modeling to drive efficiency and inform strategic decisions.

Experience

SR. ANALYST, SOLUTIONS & AUTOMATION | THE WALT DISNEY COMPANY | MARCH 2026 – PRESENT

- Own development of AI-powered HR analytics solutions using Snowflake Cortex, translating complex workforce data and business requirements into trusted data products.
- Design semantic models and data architecture in Snowflake, defining business logic, metrics, dimensions, and relationships to establish consistent sources of truth for workforce analytics.
- Built an automated AI evaluation framework to validate response accuracy against established HR reporting, reducing testing time by ~35 hours per enhancement and systematically identifying data, logic, and model gaps.
- Lead product planning, prioritization, and stakeholder communication, translating technical trade-offs, risks, and analytical findings into decision-ready recommendations for senior leadership.

SENIOR F&B/MERCHANDISE ANALYST | THE WALT DISNEY COMPANY | AUGUST 2023 – MARCH 2026 | LAKE BUENA VISTA, FL

- Led stockroom analytics and operating-model redesign, delivering \$2.5M+ in annualized pilot savings and enabling a \$6M property-wide rollout.
- Owned end-to-end delivery of Disney's first Merchandise mobile reporting product, enabling near real-time performance and target visibility for 1,000+ operational leaders.
- Designed and launched an enterprise-wide shrink analytics solution across all domestic Parks retail locations, reducing reporting latency from three months to 24 hours and enabling faster operational decision-making.
- Directed design, testing, and deployment of Python-based financial and Guest behavior forecasting models for an enterprise merchandise reporting platform, mentoring an analyst and leading code reviews and model validation.
- Provided day-to-day leadership and mentorship to a junior analyst on a high-visibility initiative, conducting regular 1:1s and guiding technical approach, prioritization, and project delivery.
- Led technology investment analyses and presented recommendations to executive leadership, informing expansion strategy and long-term product roadmaps.

LABOR TRANSFORMATION ANALYST | THE WALT DISNEY COMPANY | NOVEMBER 2021 – AUGUST 2023 | LAKE BUENA VISTA, FL

- Developed workforce planning and staffing models to translate operational demand into resource requirements, supporting labor planning and scheduling decisions across complex operations.
- Developed Tableau workforce analytics dashboards providing real-time visibility into staffing requirements and workforce planning.
- Built attrition and hiring forecasting models using historical trends and seasonality to inform workforce planning and recruiting demand.

Education

BS Industrial Engineering & Engineering Mgmt. | MAY 2021 3.8 GPA – MAGNA CUM LAUDE | SOUTH DAKOTA MINES

Skills

Core: Analytics Product Ownership • Workforce & People Analytics • Data Strategy & Quality • Forecasting & Predictive Modeling • Cross-Functional Leadership • Technical road-mapping • Executive Communication

Technical: Snowflake • Snowflake Cortex • SQL • Python • Data & Semantic Modeling • AI Evaluation • Power BI • Tableau • ETL • UAT • Power Query • Power Platform • Git
